

MAKE THE
RIGHT MOVE.

Floor Tiles Collection 2018

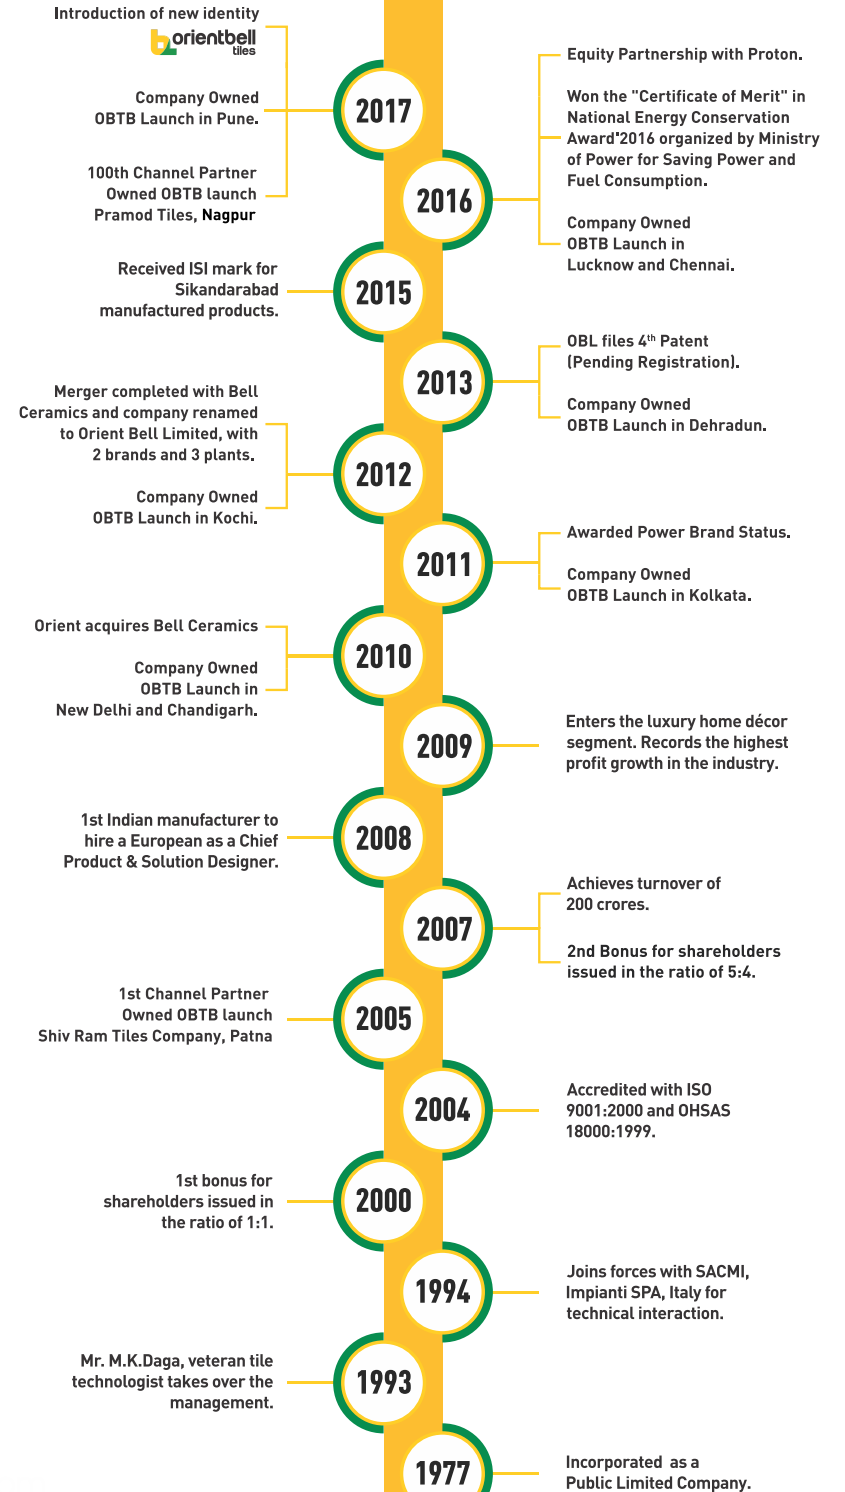

Orient Bell Limited was established in the 1977, with its base in New Delhi. The company is one of the largest manufacturers of ceramic and vitrified tiles as well as the first to manufacture ultra-vitrified tiles in India. It has launched a chain of signature showrooms to display the complete product range by aiding retailers in concept selling and is privileged to be associated with the premier construction and consultancy agencies of the country. Its new product design and development is a continuous process, which aids in providing an extensive product range in tiles with various finishes and textures. With specialty tiles for different applications, Orient Bell has patent pending technologies for four varieties of tiles and counts some of the leading influencers, developers and government institutions as its customers.

At OBL, we believe in the religion of excellence and our customers look to us with the anticipation that our next move will yield another inspired more stunning creation. It is not surprising that such devotion has earned us not only the patronage of our customers but also the accreditation of ISO 9001:2015 for our quality control management systems. Our manufacturing units employ the latest technology to manufacture products that adhere to international standards. We strive to raise our own benchmark, thus meeting the demands of both aesthetic appeal and durable functionality of our customers. Our manufacturing units are also certified in accordance with ISO 14001:2015 and International standard, the most complete and global expression for an environment friendly industrial company. In May 2000, OBL was awarded the prestigious ISO 14001 certification by the internationally recognized BSI Management Systems, U.K. In 2015 our Sikandarabad plant was awarded with prestigious ISI certification for Sikandarabad produced products. We won the "Certificate of Merit" in National Energy Conservation Award' 2016 organized by Ministry of Power for saving Power and Fuel Consumption.

“ The best interiors are a reflection of where you have come from and a signifier where you want to go. ”
